

Before Construction

## **Heading Avenue Roadway Improvements** **West Peoria, Illinois**

### **Project Scope:**

The lack of storm sewer on this urban street with curb & gutter prompted the City of West Peoria to initiate a drainage improvement project to alleviate standing water in the street and maintenance issues that arose from a saturated subgrade. Hermann & Associates was hired to design a storm sewer system capable of handling the storm water runoff and correcting the deficiencies which had resulted over the years. This project was processed through IDOT District 4, Bureau of Local Roads.

Before Construction
